

Stanton P. Hill, MBA, PMP, CNAP

Chief Financial & Operating Officer, National Society of Black Engineers (NSBE)

Stanton Hill serves as Chief Financial & Operating Officer (CFOO) for the National Society of Black Engineers (NSBE), one of the largest student-governed organizations in the country.

In his role, Hill oversees NSBE's finance, accounting, and operational strategy, driving process improvements, fiscal transparency, and long-term sustainability in support of NSBE's mission to increase the number of culturally responsible Black engineers who excel academically, succeed professionally, and positively impact the community.

Career Bio

Stanton Hill brings more than a decade of experience in financial strategy and nonprofit operations. Prior to joining NSBE, he held several roles at the United Negro College Fund (UNCF), where he managed multimillion-dollar operating budgets, streamlined financial processes, and led grant management initiatives totaling over \$30 million.

He began his career with a focus on business analytics and process optimization and has since advanced through NSBE's leadership ranks: from Director of Finance and Accounting to Chief Financial Officer, and now Chief Financial & Operating Officer.

Stanton Hill earned his Bachelor of Arts in Business Administration from Morehouse College and a Master of Business Administration with a concentration in Innovation, Entrepreneurship, and High Technology from Northeastern University.

Topics Stanton Hill Can Speak To:

- **STEM Pipeline & Generational Engagement**
 - Making engineering a "household word" in Black and Brown communities.
 - Keeping students engaged with NSBE beyond college and into professional careers.
- **Practical Applications of Engineering**
 - How engineers impact everyday life (bridges, infrastructure, AI tools).
 - Countering misconceptions that engineering is only for "techies."
- **The Parent Perspective on STEM Exposure**
 - Encouraging early exposure to STEM education for Gen Z and Gen Alpha.
 - How parents can help their kids see engineering as attainable and exciting.
- **Engineering & Finance Intersection**
 - Economic case for engineering careers vs. influencer culture.
 - Financial literacy for young engineers entering the workforce.
- **Infrastructure & Investment in Engineering**
 - Discussing how federal infrastructure spending impacts engineering jobs.
 - Predictive analytics and data tools in finance and engineering collaboration.
- **Professional Retention & Alumni Engagement**
 - Re-engaging NSBE alumni through mentorship, board service, and entrepreneurship.
 - Building a tiered approach for career development and recognition in NSBE.
